Live Investigation Enhancement

Posted by crystalcross - 17 Oct 2011 01:17

_____

Have been working on the Live Investigation module most of the day today. At this point live investigations have been tied into the Videos module under a new category called "Live Investigation Recordings".

Any live investigations will now also be recorded and archived for later viewing. Live investigation will soon be available for any group wishing to participate. Also for individuals who wish to set up a static infrared camera in an area where activity has been reported.

We've also created the groundwork for an "On the Air" notice to let you know when a feed is broadcasting, and also a link into our twitter and facebook feed so that all our friends will know when a feed is taking place.

Good things coming, stay tuned!

We also welcome ideas if you have a good idea, we'll add it in!
