_____

I was Wondering if there was anywhere I could fix the way the forums look when I log in everything flips and I see the replies before I see the original Post

_____

Great question!

Yes there certainly is. Find the "PROFILE" link on the main menu bar, click it.

Then when your profile comes up click "Edit" and then "Update Profile"

On the profile update page you'll see a "Forum" tab.

Select it, and from there you can change a variety of settings.
