Evps from a location in Willow Springs, Illinois

Posted by Moonie - 28 May 2012 03:39

_____

These evp captures were from a location in Willow springs

This one is for fun

Why you should turn your cellphone off or on vibrate at the very least

_____

Iam not sure I hear anything in the first two but I definitely hear

in 3 " You have been watched"

and in 4 "Hi or Hide"

_____

nice catch on audio 3 others hard to tell it would be a good idea when playing your evps to that them play in there origanl form without enhancing to much

_____

Ghost

all of them are the originals ha ha

Wanted to see what people heard and though first.

Number one says "frightened mommy"....a growl(Philips stomach)me then "mommy"

iburyem this is the evp caught when the photo of the child was taken. The beep is my camera taking the picture.

here it is amplified

the second one Phillip thought was cussing..labeled like that too, but not what it says at all. I think..not positive that it says oh watch your back.

That day Phillip was scratched pretty bad and another investigator was bitten on the hand.

here is the amplified version

The third we think is residual. There was a pretty violent rape in the area we caught this a few years back. We believe it says "tear her blouse"

amplified

The last one we believe simply says "run"

amplified and slowed down just a tad

_____

So glad I made your day with staged evps. Its what I

I live for:-)

Nope I still have the recordings on the recorder. I am capable of getting good stuff even a class A or too.

So care to explain why you think they are staged. I would love to hear your input:-)

_____

1st recording sounds right... frightened mommy...mommy

2nd recording sounds more to me like "don't want you here"

3rd recording sounds more like "rip her blouse" to me

and the 4th one sounds like a nasty hiss. Possibly from the same one that did not want you there and scratched.

Very good recordings.

_____

the first two sound metalically to me, harder for me to decipher.

3 sounds like, "tear her blouse" and last sounds like "Hi", what sort of recorder do you use, they sound metallic.. if that makes any sense.
