_____

sorry about the evp I'm not that sharp at the computer. so I will share with you a ghost Picture I took in Saint Augustine Fla. This one actually followed me home at least several people have seen him oh well he will get tired and go away. I think he is from the period of around 1700s not for sure . what do you think? Saint Augustine is full of spirits or ghosts at night they come out. I was there a short period plans in the future to stay longer and hopefully see some of you there. This spirit was seen with the eye by several people.
