the Mary Organ experience

Posted by normanglasser1 - 23 Oct 2012 20:32

_____

Several years ago a grave that I found in a small cemetery called out to me. I have never forgotten her name Mary Organ. I have found myself connected to her in a odd way, I knew no history of this women years later I found myself living in the house where she had died. After about a year we kept seeing a spirit of a female at the top of the stairs really not strange in our home because we see spirits that come and go. We have had hundreds of people seeking the spirits of their lost ones. the following pictures were taken several years before we bought our present day home which was built in the mid 1800s. I feel that this is the spirit off Mary Organ

Norman, she strikes me as a rather unpleasant woman. And maybe you knew her in your last life and that's why she is looking for you.
